# p 2: Defining variables
## l functions

mployee_details.js, initialize the employees array
ect. Initialize it with key value pairs as follows:

```
const employees = [
    { id: 1, name: 'John Doe', age: 30, c
    { id: 2, name: 'Alice Smith', age: 28
    { id: 3, name: 'Bob Johnson', age: 35
    //... More employee records can be ac
];
```

ate the **displayEmployees()** function to display
ployees details in **employee_details.js** file.

```
// Function to display all employees
const totalEmployees = employees.map((emplc
        document.getElementById('employeesE
}
```

The map method iterates through each employee in
